DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18 and 21-23, drawn to an electromagnetic valve with a cavity port through which elements can be introduced.

Group II, claim(s) 19-20, drawn to an electromagnetic valve with a freely displaceable shut-off piston.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical features of Group I, a cavity port through which electromagnetic control elements can be introduced, is not shared in group II. The special technical feature of group II, a shut-off piston which is freely displaceable within the valve body, is not shared by group I. Therefore, the respective groups lack the same or corresponding special technical features and do not relate to a single general inventive concept.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
